

## President's Remarks

Well, how does one begin his remarks after a disappointing fraudulent election and national disgrace?

When churches tried to gather for worship, while honoring health restrictions—**they were banned from singing, speaking, or even meeting.**

Republicans are censored by big tech, smeared in the media, and mocked in popular culture, and we endure malicious political prosecution.

I know the results for the presidential election suck. Which means that we have a lot of work to do between now and November 2022.

But we must not lose hope. Instead, we must fight back with the truth.

We keep our heads up and work... work .... work.

Today, with the radical Left increasing its efforts to undermine traditional American values and transform American government and society, ....Socialism, also known as communism, is on the rise in our country, especially among the young, and I think, a majority of Americans do not understand the extent of that state of mind.

**Sadly, several recent polls and events around the country show that an increasing number of young Americans are being drawn to socialism and other ideas destructive to our lives, freedoms and liberties.**

**"The danger to America is not Joe Biden, but a citizenry capable of entrusting a person like him with the Presidency. It will be far easier to limit and undo the irrationalities of a Biden/Harris presidency than to restore the necessary common sense and good judgment to a depraved electorate willing to have such a person for their president.**

**The problem is much deeper and far more serious than Biden/Harris, who are a mere symptom of what ails America. The**

**Country can survive a Biden/Harris circus, but it is less likely to survive a multitude of buffoons, such as those who supported his candidacy.**

**We have become a nation that has lost its collective mind! We see other countries going Socialist and collapsing, but somehow it seems like a great plan to some.**

There is no doubt in my mind that, especially among younger Americans, socialism is increasingly attractive—and that this threatens the future of American liberty. As Winston Churchill stated, “Socialism is the philosophy of failure, the creed of ignorance, and the gospel of envy.” And education is the surest way to defeat it.

Even worse, the Left has been increasing its efforts to push a false history of America—An America as essentially flawed and unjust—to undermine traditional patriotism, with the ultimate goal of transforming American government and society.

Today’s younger generations are NOT like yours or mine was.

They don’t understand the true price of freedom and the sacrifices millions of Americans made to defend our way of life.

I am very disappointed that we have not fought hard against the Left’s dominance in our colleges and universities, and its increasing indoctrination in K through 12 grade education.

It’s not entirely their fault – they just haven’t had the same influences to teach them the valuable lessons of service, sacrifice, and leadership. Are they going to be taught those valuable lessons learned by veterans?

I sure hope so, because **you can't justify this insanity.**

We have done too many, of our young people, a disservice by failing to provide them with knowledge of our nation’s great heritage of liberty. Even worse, many of our schools, corrupted by Left-wing bias, have pushed a false history of America as essentially flawed and unjust..

By any measure, the quality of American K-12 education has been declining for decades, even as more and more tax dollars have been thrown at it.

Are K through 12 schools, colleges, and universities doing enough to provide students with a proper understanding of American history and government—including an understanding of the purposes and principles of the Constitution? An absolute NO!

One of the most alarming aspects of this decline has been the failure of K-12 schools to provide young Americans with the basic knowledge of American history and government that is essential to good citizenship.

And all this leads to a decreasing sense of patriotism among young Americans, and an increasing attraction to socialism and other ideas destructive of our liberty.

All of us have seen and heard things during this past year that would have been unimaginable in 2019, but which today are almost a daily occurrence. The media calls this “the new norm.”

As we begin 2021, with faith, hope and optimism, we’d like to hear from you as new strategies are developed through 2022.

**SPEAKER**

Wayne Christian was a Member of the Texas House of Representatives from 2007 – 2013.

Commissioner Christian is a current commissioner of the Texas Railroad Commission, a regulatory body that oversees the oil and natural gas industries in Texas.

A big Hill Country Welcome to Commissioner Christian.

Commissioner, thank you for your service to Texas and fighting those who do not have any interest in the betterment of Texas. You come up for re-election in 2 years, and you have my endorsement. Just think, we’re ending a presidency with your being here on a positive note. By the way, Kerrville had the first water injection well in Texas, for future use.
